

# YUVRAJ SINGH

Data Analyst

yuvrajofficial25@gmail.com | +91-8669137149 | [linkedin.com/in/ys-analytics](https://www.linkedin.com/in/ys-analytics) | [github.com/YS-Analytics](https://github.com/YS-Analytics) | [portfolio-fp4n.vercel.app](https://portfolio-fp4n.vercel.app)

## PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, Excel, and Business Intelligence (BI) tools, having processed 65,000+ records across healthcare, geospatial, and quick-commerce domains. Skilled in building automated ETL pipelines and interactive dashboards using Power BI, DAX, and Power Query to translate raw data into actionable business insights. Strong foundation in exploratory data analysis (EDA), KPI engineering, and data modeling, seeking a Data Analyst role to support data-driven decision-making.

## TECHNICAL SKILLS

- Languages:** SQL (MySQL, PostgreSQL) — joins, window functions, stored procedures; Python
- BI & Visualization:** Microsoft Power BI, Power Query, DAX, Advanced Excel (Pivot Tables), Tableau
- Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn
- Core Methodologies:** Exploratory Data Analysis (EDA), ETL Pipelines, Data Cleaning, Data Modeling, KPI Reporting, Dashboard Development, Statistical Analysis, Stakeholder Reporting, Data Storytelling

## EXPERIENCE

### Maharashtra Remote Sensing Application Centre (MRSAC)

Student Intern

Nagpur, India

Dec 2025 - May 2026

- Collected, cleaned, and transformed 2M+ real-time traffic data points from TomTom Live Traffic APIs across 5+ regional districts, improving data quality and reliability for incident analysis.
- Automated traffic data analysis workflows using Google Gemini AI, reducing manual analysis time by 35% and accelerating identification of congestion patterns for road safety planning.
- Designed interactive geospatial dashboards and automated reporting pipelines covering 10+ KPI metrics, including hotspot frequency, peak congestion windows, and incident response times, to support operational decision-making.

## KEY ANALYTICS PROJECTS

### HealthMetrics - Healthcare Analytics Dashboard

Power BI, SQL, DAX, Power Query | [Project Link](#)

- Built an end-to-end Power BI dashboard tracking hospital operations, inpatient admissions, revenue trends, and satisfaction scores across 5,000+ clinical records, accelerating operational reviews.
- Architected data transformation pipelines across 15+ relational database tables using SQL and Power Query, reducing data inconsistency by 40% and establishing clean, reliable reporting layers.
- Formulated 12+ custom DAX measures and KPI tiles to monitor bed occupancy thresholds, billing variations, and doctor efficiency metrics, cutting manual reporting effort by 3 hours per week.

### Blinkit Analysis Dashboard

Power BI, Excel, DAX, Power Query | [Project Link](#)

- Built a quick-commerce dashboard analyzing 10,000+ transactional records to monitor fulfillment timelines, customer retention, and regional inventory health, supporting weekly business reviews.
- Engineered reliable data models by merging and cleaning 10+ operational data tables, improving cross-functional metrics consistency and reducing reporting errors by 25%.
- Programmed 15+ DAX calculations, including Average Order Value, Campaign ROI, and Delivery Success Rate, to surface regional conversion performance and help identify product supply drop-offs.

## EDUCATION

### GH Raisonni College of Engineering and Management

Bachelor of Technology in Computer Science and Engineering

Nagpur, India

2022 - 2026

### Guru Nanak Public H/S School

Higher Secondary Certificate (12th, Maharashtra State Board) - 81.67%

Ballarpur, India

2021 - 2022

### Dilasagram Convent High School

Secondary School Certificate (10th, CBSE) - 80.8%

Ballarpur, India

2019 - 2020

## CERTIFICATIONS

- Complete Data Analyst Bootcamp: From Basics to Advanced** - Udemy, 2025. Covered Python, SQL, Power BI, Advanced Excel, and Statistics through real-world dataset deployments.
- Python: Master Programming and Development** - Udemy, 2025. Focused on object-oriented programming, data handling pipelines, automation scripts, and API integrations.
